

Is There Room for Hope in Today's Healthcare?

You may not remember the exact words spoken to you when receiving bad news for the first time, but you may recall the feeling in your body and in the room. Being told that you better sit down, that there is nothing that can be done, hearing an expiry date on life, feeling like everything is over. Then maybe you realize you have a choice, do you listen to it and accept it, or do you hope for the best and give it everything you've got.

We are recruiting from
October 2023 until
August 2024.

If you or a loved one has received a terminal or life limiting diagnosis, we would like to hear from you about your experience. Do you feel like there is room for hope in today's healthcare? We are researching how people with a terminal illness and their families think about hope.
